

## Questions to Ask Your Doctor

Bring this card to your next appointment. Asking clear, direct questions helps you and your healthcare team make the best decisions for your health. These questions can guide your visit and ensure that nothing important is overlooked.

*Funding for this project was provided by HealtheVoices Impact Fund at the Community Foundation of New Jersey, which was funded by a contribution from Johnson & Johnson.*

What screening tests are available to me?

Do I qualify for early colorectal cancer screening?

If I have symptoms, what tests should be ordered first?

If I have to wait for a specialist, what can I do in the meantime?

What are the warning signs I should look for?

What happens if my test results are positive?

If my symptoms do not go away, when should I come back?

Are there at-home test options like FIT or Cologuard I can use now?

Do I need to change my diet or medications before testing?

Is there anyone I can contact if I have more questions after my visit?
